

Measure for Delivery

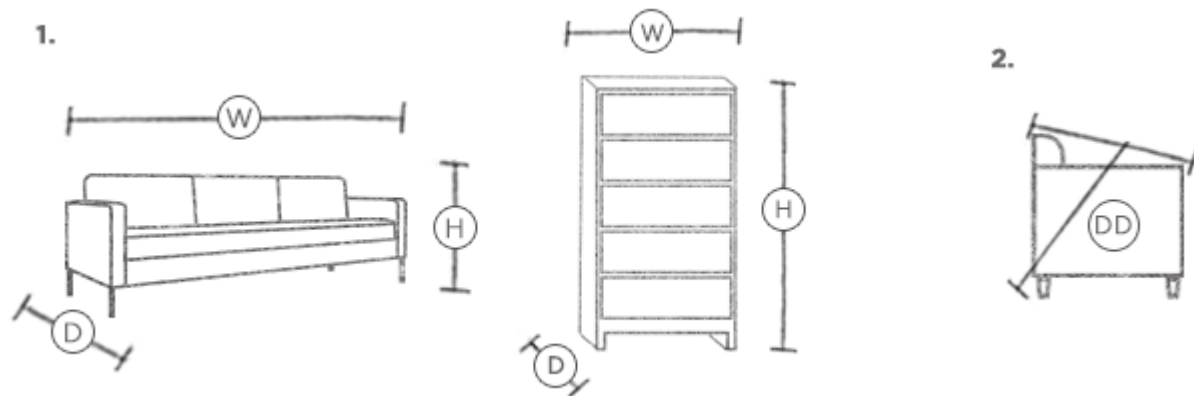

'Measure for Delivery' is an important and a necessary exercise for the smooth entry of your desired furniture into your home or premises.

Kindly follow the below mentioned steps to help you how to measure for delivery:

1. Check the Furniture Size

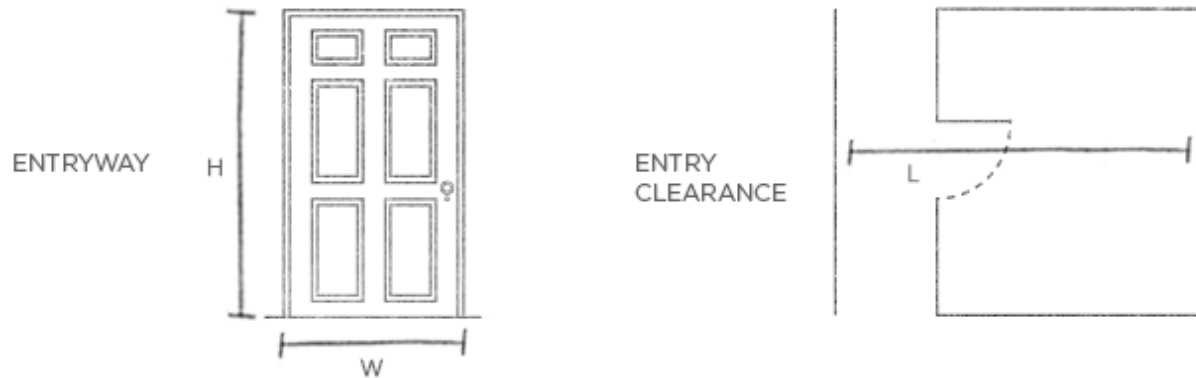

Make sure the furniture you're considering should be able to fit in your space. Our mentioned dimensions (width x depth x length) will help you decide.

- a) In case of a sofa or chair, also note the diagonal depth (**DD**), which will determine if the piece can be brought through tighter entryways at an angle.

2. Check Your Home Entry + Clearance Path

- a) Before selecting your new furniture, please be sure that it can be delivered through all entryways, elevators and stairways.
- b) Measure the height (H) and width (W) of your entryway, elevator doors, interior hallways, doorways and stairs. Also, measure the total length (L) of clearance between the outside and interior wall.

c) Make sure there's an unobstructed path and adequate clearance in front of and beyond each doorway. Make note of any fixtures, decorative moldings, ceiling heights, stairwells and banisters that may pose an obstacle once furniture is inside.

3. For Further Assistance

We provide the width, depth and height of our furniture online and in our show room (measurements are calculated from each piece's widest or tallest point). Some pieces have removable legs, feet or bases, enabling delivery through smaller spaces. For additional details, ask a store associate or call our customer care at [+91 120 6774222](tel:+911206774222).
